

## **District 5420 Rotarians Sewing Face Masks**

Rotarians throughout District 5420 are doing their part to ease the shortages of PPE in Utah. Masks come in many styles and applications and so do the Rotary efforts. Sunrise Park City Rotarians are sewing cloth masks for the local clinic staff and patients, allowing them to save their medical grade masks for the medical professionals. The Tooele Valley Rotary Club is partnering with Mountain West Medical Center to sew clinical masks, using surgical wrap material donated by the hospital. And talented seamstresses with the Brigham City Rotary Club have teamed up with Days for Girls, sewing cloth face masks by the hundreds. Would you like to help out?
